

Who are we?

INTROS Automation is a dynamic, ambitious, and fast-growing company specializing in projects related to the integration of robots and systems. We support our clients in the design, optimization, and implementation of innovative technological solutions.

Are you passionate about industrial automation, robotics, and programming automated systems, and enjoy tackling complex technical challenges? INTROS Automation wants to meet you! To strengthen our team, we are currently looking for an:

AUTOMATION ENGINEER

Job Description:

As an Automation Engineer, you will support our team across all engineering activities. Your main focus will be software development for automation, but a general understanding of electrical systems is also required to grasp the entirety of the systems. You will also regularly collaborate with our hardware department, particularly in the design of electrical schematics, and you may occasionally take on project management responsibilities in this context.

Your profile:

- Holder of a Bachelor's or Master's degree in a technical discipline.
- Minimum of 3 years of experience as an Automation Engineer.
- Proficient in PLC programming.
- Knowledge of motion control, robotic programming, and safety systems.
- Hardware engineering skills, particularly with EPLAN P8 and AutoCAD.
- Understanding and interest in the Machinery Directive, standards (60204, 61439, 13849, CE, etc.), and Performance Level calculations.
- Good command of Microsoft Office.
- Ability to work accurately and rigorously, with strong attention to detail.
- Ability to work independently while integrating effectively into a team.
- Hands-on, proactive, and ready to take initiative.
- Driving license (B) and personal vehicle.

What we offer:

- Daytime work in a young and fast-growing company.
- Participation in numerous varied projects, offering challenges and autonomy.
- Work with a wide range of industrial clients.
- Opportunities for career development over time.
- Competitive salary based on experience and age.
